

High Pressure Relief Valves - R410A

Henry Technologies

ASME Certified, National Board Approved Pressure Range: **500-675 psig** (34.5-46.6 Bar).

This series of relief valves is suitable for use with R410a refrigerant and other CFCs & HFCs non-corrosive to brass and carbon steel. Standard set pressures include 500, 550, 600, 650, & 675 psig. Stock typically held on 650 & 675 psig settings.

Model Number	Relief Capacities, lbs-air/min				
	Standard Pressure Settings, psig				
	500	550	600	650	675
5233A	31.2	34.2	37.2	40.3	41.8
5234A					
5235A					

Model Number	Connection Size & Type		Dimensions	
	Inlet	Outlet	A	B
5233A	3/8" NPT	7/8" Flare	4.56	1.25
5234A		3/4" NPT	4.20	
5235A	1/2" NPT		4.40
